TITLE	Readiness for College: A Postsecondary Feedback Report to Florida's Public High Schools and School Districts, 1992-93. State and District Summaries.
INSTITUTION	Florida State Dept. of Education, Tallahassee.
PUB DATE	Feb 94
NOTE	189p.
PUB TYPE	Statistical Data (110) -- Reports - Evaluative/Feasibility (142)
EDRS PRICE	MF01/PC08 Plus Postage.
DESCRIPTORS	*Academic Achievement; Achievement Tests; *College Freshmen; *College Preparation; Ethnic Groups; Higher Education; *High School Graduates; High Schools; Mathematics Achievement; *Outcomes of Education; Public Schools; Reading Achievement; *School Readiness; School Readiness Tests; Screening Tests; Sex Differences; Student Placement; Tables (Data); Writing Achievement
IDENTIFIERS	*Florida

ABSTRACT

This third annual report documents performance of Florida public high school graduates who became first-time-in-college students at public postsecondary institutions throughout the State within 1 year after graduation. The outcome report reflects the preparedness of Florida students for postsecondary education by documenting the number and percentage of students who performed adequately on an entry level placement test. The report includes state summaries by district, by postsecondary institution, and by ethnic origin and gender. It then presents reports on each of 75 school districts, indicating the number and percentage of students from that district who passed the placement test, by postsecondary institution, ethnic group, and gender. The report indicates that: (1) the overall performance of students on the placement test declined slightly from 1991-92 to 1992-93, from 60 percent being ready for college-level study to 58.4 percent being ready; (2) performance on the entry-level placement test remained lower in mathematics than in writing and reading; (3) performance of community college students dropped slightly, while performance of State university students improved slightly; (4) all ethnic groups except American Indians experienced a decline in overall performance; and (5) females performed better in writing than males, while males performed better in mathematics, reading, and overall. Appendices include texts of relevant sections of state laws and regulations. (JDD)

READINESS FOR COLLEGE

A Postsecondary Feedback Report
to Florida's Public High Schools and School Districts

INTRODUCTION

In 1983, the Florida Legislature established a requirement for providing performance information to the school districts on their high school graduates who enroll in Florida's public community colleges and state universities. During the first years of this policy, the community colleges and state universities were required to report transcript type information on individual students directly to the districts. Subsequently, the Legislature required the Commissioner of Education to provide summary information of student performance to the State Board of Education, the Legislature, and the school districts.

Currently, the Florida Legislature requires the Commissioner of Education to provide reports on the performance of Florida public high school graduates who enroll in public postsecondary institutions throughout the State (See Section 240.118, Florida Statutes, on page A-1 in Appendix A). The responsibility for producing and distributing the required report is assigned to the Office of Postsecondary Education Coordination in the Florida Department of Education. This is the third annual report on high school graduates who became first-time-in-college students within one year after graduation. The first was distributed to the school districts in January 1993. The second was distributed in May 1993. The May 1993 report is considered the base line report because it is the first report for which all community colleges and state universities provided data. It was recognized that some of the community college data reported in the second report were incomplete when the report was published. While some community college data still may be incomplete, the information in this report should be more accurate than the preceding reports because the community colleges and universities have had the opportunity to review the previous reports and make adjustments to improve the accuracy of their data bases from which this report is derived.

The reader is asked to keep in mind the following caveats while interpreting this report and making conclusions and generalizations from it.

1. The students included in this report were 1992 Florida public high school graduates who were also first-time-in-college (FTIC) students during the 1992 Summer term, 1992 Fall term, or 1993 Winter/ Spring term in Florida's community colleges and state universities.

2. The criteria for selecting FTIC's for community colleges and state universities are somewhat different. An FTIC student in a state university is a student registering as a degree seeking student for the first time at the state university having less than 12 transfer credits. An FTIC student in a community college is any student enrolling in the community college for the first time who has no formal credit to transfer from any institution of higher education, may be either degree seeking or non-degree seeking, and is enrolled in a course in one of the following categories of instruction: 1) advanced and professional, 2) postsecondary vocational, 3) postsecondary adult vocational, 4) college preparatory, or 5) vocational preparatory. For this report,

however, the community college FTIC's include only degree seeking students since non-degree seeking students are not required to take the entry-level placement tests. Also, high school students taking courses for dual enrollment credit at the community colleges and state universities, because they are not eligible for degree seeking status until they graduate from high school, are not considered to be FTIC students even though they may be required to take an entry-level placement test.

3. The year of graduation is indicated in community college student records. The state university student records, however, do not contain that information. State university students were selected for this report by date of birth in order to approximate the year of graduation.

4. The entry-level placement testing requirements of Rule 6A-10.0315, Florida Administrative Code (see pages B1-B2 in Appendix B), form the basis for evaluating student readiness reported here. The cut-off scores on the tests which have been approved for placing students in college preparatory courses in all community colleges and state universities were used to determine whether or not a student was ready for college-level work in the areas of mathematics, reading, and writing. The number of test takers, rather than the number of first-time-in-college students, was used to calculate the percentage of students ready in mathematics, reading, writing, and in all three areas.

5. Students not included in this report are high school graduates who graduated prior to January 1, 1992; graduates of private or out-of-state high schools; and students attending vocational, trade, private, and out-of-state postsecondary institutions.

The purpose of this report is to allow schools and school districts to examine the readiness of their high school graduates to enter college-level courses. This report should be useful for examining the effectiveness of the delivery of instruction in mathematics, reading, and writing, and for enhancing the instructional and student services programs relevant to these areas of student preparation for postsecondary study. Blueprint 2000, approved by the Florida Commission on Education Reform and Accountability, establishes this readiness report to high schools as one of the measures of accountability for school improvement. As schools develop their school improvement plans, the Office of Postsecondary Education Coordination stands ready to answer questions and provide additional information about this report and the data on which it is based. For additional information on how this report may be used for school improvement, see "How to Use this Report" on page vii.

Currently, there are several different tests used to place entering college and university students in college preparatory or college-level courses. Effective with the 1995 Fall Semester, first-time-in-college students who fall below a specific score on either the Scholastic Aptitude Test or the American College Test or who have not taken either of these tests will be required to take a common entry-level placement test designed specifically for Florida community college and state university students. Use of the same placement test for all state supported colleges and universities will provide a uniform standard and will improve the precision of the data contained in the Readiness for College Reports.

Your suggestions for improving this report would be appreciated. If you would like to share your ideas, please complete the enclosed Customer Comments Form and send your comments to the Office of Postsecondary Education Coordination, Florida Department of Education, 1101 Florida Education Center, Tallahassee, Florida 32399-0400.

HOW TO USE THIS REPORT

POSTSECONDARY FEEDBACK REPORT AND SCHOOL IMPROVEMENT

Refer Questions to: Mr. Bob Corley, Administrator, School Improvement Services Section, (904) 487-1636 or Suncom 278-1636

The 1993 Florida Legislature amended Section 240.118, Florida Statutes, which requires the Commissioner of Education to provide postsecondary feedback (i.e. readiness for college) information to school districts. Subsection (4) states that the State Board of Education shall assure that each school district and high school develop strategies to improve student readiness for the public postsecondary level based on annual analysis of the feedback report data as a part of the school improvement plan required by Section 229.592, Florida Statutes.

During the summer of 1993, Commissioner of Education Betty Castor appointed the Task Force on High School Preparation for Postsecondary Education and Employment. The task force was charged with reviewing Florida's high school graduation requirements to ensure that students are prepared for postsecondary education and that the graduation requirements conform to the competency-based goals of Blueprint 2000. The task force recommended that students be required to take Level II and Level III courses to meet graduation requirements to bring graduation requirements into alignment with the level of expectation associated with entry-level placement tests and college-level courses. In addition, the task force supports movement toward performance-based instruction and assessment and recommended gradually increasing the grade point average requirement for graduation until Blueprint 2000 is implemented. It was also recommended that cross-sector collaborative efforts be utilized to facilitate systemic change from the traditional educational delivery system to the Blueprint 2000 performance-based delivery and assessment system.

The Readiness for College Report is one of the few outcome measures by which the success of Florida's educational system can be monitored. The report reflects the preparedness of Florida students for postsecondary education and may be useful in planning for restructuring and improvement in the delivery of instruction in high schools. The analysis of this information, when examined along with other information about the local school, may provide insight into many areas influencing the quality and outcomes of instruction.

Here are some ways a school may use this information:

- The Readiness for College Report is used as the source of information on student readiness for college found in the School Reports distributed to parents and the public.

- Each school district, high school, and school advisory council can use the report to determine how successful the school is in preparing its graduates with college-level skills in mathematics, reading, and writing, and, based on an analysis of the data, develop strategies within its school improvement plan to improve student readiness for postsecondary education.

- Comparisons of a high school's performance through the years can be used to determine trends and evaluate effectiveness of programs implemented for improving student performance. (Are there extraordinary or historical procedures, policies, situations, or events which may have influenced trends or exceptions?) Trend information is to be part of the transition assessment in December 1995.

- The relative success of a school's students in gaining entrance to state universities and in avoiding referral to remedial courses in community colleges and state universities can be used as an indicator for guiding students' choices of courses needed to prepare them for postsecondary education.

- Data may be used to determine the relative performance of students by gender and by ethnic origin to determine group needs for special assistance.

- Individual student performance reports can be used to compare performance with courses students took in high school to identify those courses most closely linked with high performance.

- The district and school curriculum priorities and the readiness of students can be compared in mathematics, writing, reading, and overall to determine which curriculum areas should be emphasized in the future.

- School and district expectations and practices can be compared to those of other districts and schools to determine their effectiveness in preparing students for a higher level of readiness for successful postsecondary work.

- Analysis of the Readiness for College Report can identify focus areas for collaborative articulation activities between public schools, community colleges, and universities.

- The Readiness for College Report is to be used to determine the high schools which will be recipients of incentive grants funded by the Legislature.

- Proviso language of the 1993 Legislature requires that the 1991-92 Readiness Report be used to calculate possible penalty charges to the school districts for remedial courses taken by students from each school district because they were not ready for college-level study. The 1994 Legislature will review this information to determine whether actual penalties will be imposed on the schools and school districts.

The Florida Department of Education is prepared to assist any school wishing to look at additional ways these data can be used to identify trends and provide information having relevance for improved student performance. If you wish to receive assistance in your school or district, please contact the School Improvement Services Office (904) 488-1636 or Suncom 278-1636.

EXECUTIVE SUMMARY

The school districts with more than 70.0% of their students ready in all areas are Charlotte, Martin, Orange, St. Johns, Sarasota, Seminole, Union, and Volusia. The school districts with less than 40.0% of their students ready in all areas are Dade, Franklin, Gadsden, Glades, Gulf, Hamilton, Jefferson, Liberty, Madison, Taylor, and Walton.

Comparison of the Readiness for College Report for 1992-93 with the report for 1991-92 reveals that the overall performance of students on the entry-level placement tests has declined slightly. For the college freshmen entering the community colleges and state universities during the 1991-92 academic year, 60.0% of the students were ready for college-level study in all areas (mathematics, writing, and reading). Only 58.4% of the 1992-93 freshmen were ready in all areas. Performance remains lower in mathematics than in writing and reading. Slight declines in performance were experienced in all three of the subtest areas. Performance of community college students dropped slightly, while performance of state university students improved slightly, in mathematics, writing, reading, and in all areas.

Comparison by ethnicity reveals that all ethnic groups except American Indians experienced a decline in overall performance in all areas. Asians and students in the "other" category performed better in mathematics than in writing and reading.

Gender comparisons reveal that both males and females declined in performance from 1991-92 through 1992-93 in mathematics, writing, reading, and in all areas. Females performed better in writing than males, while males performed better in mathematics, reading, and in all areas.

APPENDICES

STATUTE AND RULE GOVERNING POSTSECONDARY FEEDBACK REPORTING

Section 240.118, Florida Statutes. Postsecondary feedback of information to high schools.--

(1) On or before January 1, 1994, the State Board of Education shall adopt rules that require the Commissioner of Education to report to the State Board of Education, the Legislature, and the school districts on the performance of each first-time-in-postsecondary education student from each public high school in this state who is enrolled in a university, community college, or public postsecondary vocational school. Such reports shall be based on information data bases maintained by the Division of Universities, Division of Community Colleges, and Division of Vocational, Adult, and Community Education. In addition, the universities, community colleges, and postsecondary vocational schools shall provide school districts access to information on student performance in regular and preparatory courses and shall indicate students referred for remediation pursuant to s. 240.117 or s. 239.213.

(2) The Commissioner of Education shall report, by high school, to the State Board of Education and the Legislature, no later than November 31 of each year, on the number of prior year Florida high school graduates who enrolled for the first time in public postsecondary education in this state during the previous summer, fall, or spring term, indicating the number of students whose scores on the common placement test indicated the need for remediation through college-preparatory or vocational-preparatory instruction pursuant to s. 240.117 or s. 239.213.

(3) The Commissioner of Education shall organize school summary reports and student-level records by school district and high school in which the postsecondary education students were enrolled and report the information to each school district no later than January 31 of each year.

(4) As part of the school improvement plan pursuant to s. 229.592, the State Board of Education shall ensure that each school district and high school develops strategies to improve student readiness for the public postsecondary level based on annual analysis of the feedback report data.

History. s. 23, ch. 83-215, s. 15, ch. 89-143, s. 66, ch. 90-288, s. 21, ch. 90-302, s. 3, ch. 91-234.

Note. November has only 30 days.

Rule 6A-10.038, Florida Administrative Code. Postsecondary Feedback of Student Information to High Schools.

(1) Each state university president and the president of each public community college shall report to the school district on the performance of the school district's public high school graduates who are enrolled at the university or community college. These reports shall indicate students who have been referred at the postsecondary institution to college preparatory instruction. This student information shall be protected according to Section 228.093, Florida Statutes.

(2) The individual student reports submitted to the school districts shall include the following requirements:

(a) The reports shall include all the first-time-in-college students who enrolled in a community college or state university during the report period and who were granted a high school diploma during the previous twelve months. The report period shall be defined as the twelve month period beginning with the summer term. The individual student reports shall be listed alphabetically by student and by school.

(b) For each student, the following common information shall be reported:

1. Name of school and county number;
2. Student legal name, social security number, gender, ethnic origin, and Florida student identifier number, when available;
3. Month, day and year of birth;
4. Reporting institution;
5. Term of first enrollment;
6. Areas of reading, writing, or mathematics for which the student's entry level test score was below the score as listed in Rule 6A-10.0315, FAC;
7. Areas of reading, writing, or mathematics college preparatory instruction in which the student enrolled at the reporting institution;
8. Credits attempted and earned toward graduation;
9. Grade point average; and
10. Courses taken.

(c) The reports shall be provided to the superintendents of the school districts by the university or community college during the month of July of each year.

(d) The reports shall include the information normally recorded on the student transcript by the university or community college.

(3) By November 1 of each year, the Commissioner of Education shall report to the State Board of Education on the number of Florida high school graduates, enrolled as first-time-in-college students in a community college or state university during the report period, who scored below the common placement test standards established for reading, writing and mathematics in Rule 6A-10.0315, FAC. These students shall be reported by the high school from which they graduated.

STATUTE AND RULE GOVERNING COLLEGE PREPARATORY TESTING, PLACEMENT, AND INSTRUCTION

Section 240.117, Florida Statutes. Common placement testing for public postsecondary education.--

(1) The State Board of Education shall develop and implement a common placement test for the purpose of assessing the basic computation and communication skills of students who intend to enter a degree program at any public community college or state university. The State Board of Education shall adopt rules which enable the community colleges and state universities to implement appropriate modifications of the test instruments or test procedures for students with disabilities.

(2) The common placement testing program shall include at a minimum the following: the capacity to diagnose basic competencies in the areas of English, reading, and mathematics which are essential to perform college-level work; prerequisite skills which relate to the College Level Academic Skills Test (CLAST); and provision of test information to students on the specific deficiencies.

(3) The Articulation Coordinating Committee shall recommend to the State Board of Education rules which would, on a voluntary basis, allow students to take the common test at the end of the eleventh grade year in public high school for the purpose of obtaining remedial instruction prior to entering public postsecondary education.

(4)(a) Community college or state university students who have been identified as requiring additional preparation pursuant to subsection (1) shall enroll in college-preparatory adult education pursuant to s. 239.301 in community colleges to develop needed college-entry skills. These students shall be permitted to take courses concurrently in other curriculum areas for which they are qualified while enrolled in college-preparatory instruction courses. Credit awarded for college-preparatory instruction may not be counted towards fulfilling the number of credits required for a degree.

(b) The administrators of a state university may contract with a community college board of trustees for the community college to provide such instruction on the state university campus. Any state university in which the percentage of incoming students requiring college-preparatory instruction equals or exceeds the average percentage of such students for the community college system may offer college-preparatory instruction without contracting with a community college.

(5) No student shall be enrolled in a college credit mathematics or English course on a dual enrollment basis unless the student has demonstrated adequate precollegiate preparation on the section of the basic computation and communication skills assessment required pursuant to subsection (1) that is appropriate for successful student participation in the course.

History.--s.24, ch. 83-325; s. 24, ch. 84-336; s. 9, ch. 87-212; s. 28, ch. 89-381; s. 52, ch. 92-136; s. 2, ch. 93-234.

Rule 6A-10.0315, Florida Administrative Code. College Preparatory Testing, Placement, and Instruction.

(1) When enrollment is for any academic term prior to January 1, 1993, first-time-in-college applicants for admission to community colleges and universities who apply to enter degree programs shall be tested for reading, writing, and mathematics proficiency prior to the completion of registration, using one (1) or more of the tests listed in this subsection, and shall enroll in college preparatory communication and computation instruction if the test scores are lower than those listed below.

(a) ACT Assessment, American College Testing Program.

Reading	14	Composite Standard Score
Writing	14	English Usage Standard Score
Mathematics	13	Mathematics Usage Standard Score

(b) ASSET, American College Testing Program.

Reading	22	Raw Score
Writing	43	Raw Score
Mathematics	12	Elementary Algebra Raw Score

(c) MAPS, College Entrance Examination Board.

Reading	12	Scaled Score
Writing	30	Test of Standard Written English Scaled Score
Mathematics	206	Elementary Algebra Scaled Score

(d) SAT, College Entrance Examination Board.

Reading	340	Verbal Standard Score
Writing	30	Test of Standard Written English Scaled Score
Mathematics	400	Mathematics Standard Score

(2) For admissions after October 1, 1991, for enrollment for the academic term beginning in January 1992 and thereafter, first-time-in-college applicants for admission to community colleges and universities who apply to enter degree programs shall be tested for reading, writing, and mathematics proficiency prior to the completion of registration, using one (1) or more of the tests listed in this subsection, and shall enroll in college preparatory communication and computation instruction if the test scores are lower than those listed below.

(a) ACT Assessment, American College Testing Program.

Composite	14
English	15
Mathematics	13

(b) Enhanced ACT, American College Testing Program.

Reading	16
Writing	16
Mathematics	16

(c) SAT, The College Board.

Reading	340
Writing	31
Mathematics	400

(d) MAPS, The College Board.

Reading Comprehension	13
TSWE	31
Elementary Algebra	209

(e) New MAPS, The College Board.

Reading Comprehension	109
Conventions of Written English	311
Elementary Algebra	613

(f) CPT, Computerized Placement Tests, The College Board.

Reading Comprehension	72
Sentence Skills	78
Elementary Algebra	51

(g) ASSET, American College Testing Program.

Reading Skills	22
Language Usage	43
Elementary Algebra	12

(h) New ASSET, American College Testing Program.

Reading Skills	37
Writing Skills	37
Elementary Algebra	37

(3) Nothing provided in Rule 6A-10.0315(1), FAC., shall be construed to prevent the enrollment of a student in college preparatory instruction if the community college or university determines that such enrollment would enhance the student's opportunity for future academic success. The determination of enrollment would be made after counseling with the student and the analysis and consideration of other assessment techniques and measurements, which may include transcripts, grade evaluations, diagnostic, placement or psychological instruments, or other indicators or predictors of academic performance.

(4) Students whose first language is not English may be placed in college preparatory instruction prior to the testing required herein, if such instruction is otherwise demonstrated as being necessary. Such students shall not be exempted from the testing required herein.

(5) Test modifications and exemptions in Rule 6A-10.0314(1), FAC., shall apply in the case of applicants with records of physiological disorders.

(6) Institutions affected by this rule shall accept test scores on any one of the tests identified in Rule 6A-10.0314(1), FAC. Individual student scores shall be valid for three (3) years.

(7) During the first term, full-time students who are registered for at least twelve (12) credits, shall begin competency-based preparatory instruction based on the placement test results. Part-time students shall enroll prior to completing twelve (12) credits.

(8) Students shall not enroll for more than three semesters in each skill area to complete college preparatory instruction. Students who withdraw officially before the midpoint of a semester may be considered to have not enrolled that semester for purposes of this limitation. Students who withdraw officially at or after the midpoint of a semester shall be considered to have enrolled that semester unless the withdrawal can be documented as due to reasons of personal hardship or disability, or under major extenuating circumstances. Such exceptions require approval under guidelines established by the board of trustees or the Board of Regents. Students enrolled in English as a second language may be exempted from this limitation based on a plan submitted by the institution and approved by the Board of Regents or the State Board of Community Colleges for their respective institutions.

(9) Uniform standards for completion of competency-based college preparatory instruction shall correspond to those listed herein for placement in college credit instruction. Once competence has been certified, other public community colleges and universities shall accept the certification upon student transfer. Competence shall be certified upon:

(a) Successful completion of courses in which the competencies specified in Rule 6A-10.033(1)(c)1., FAC., are taught,

(b) Passing a criterion-referenced assessment which tests the competencies specified in Rule 6A-10.033(1)(c)1., Fac., or

(c) Achieving the scores in Rule 6A-10.0315(1), FAC., on the tests listed, or the comparable scores on a validated, analogous norm-referenced test(s).

(10) Students enrolled in college preparatory instruction shall be permitted to take courses concurrently in other curriculum areas for which they are qualified.

(11) The Commissioner shall report to the State Board of Education by November 30 each year the results of the common placement testing.
